

THE POWER OF RWE TO OPTIMISE HS MANAGEMENT

REGISTER NOW

Dear [Insert Name],

Join our expert speakers in hidradenitis suppurativa (HS) for a **virtual 90-minute educational webinar for healthcare professionals**, streaming live during HS Awareness Week in June.

This session will move beyond trial data to explore the vital role of real-world evidence (RWE) in understanding and managing HS. We will address the limitations of both clinical trial data and RWE, demonstrating how the latter complements traditional trial data and fills critical data gaps, enabling a **'hit hard and early'** approach to prevent irreversible damage.

Our panel of expert speakers will deliver stimulating presentations and **interactive Q&A sessions**, creating an **engaging learning experience** that challenges your clinical practice and encourages meaningful discussions.

Webinar details

**Beyond the data:
Taking a real-
world view of
clinical outcomes
in hidradenitis
suppurativa**

Tuesday, 2 June 2026
17:00–18:30 BST |
18:00–19:30 CEST

Join us for this exceptional, CPD-accredited learning opportunity

Live events will be translated into French, German, Italian, and Spanish in real time, making this educational programme more accessible.
